Lakhimpur-Kheri UP

PROFESSIONAL SUMMARY

Analytical and detail-driven BTech IT graduate with knowledge of Python, SQL, Machine Learning, and Data Visualization tools, seeking a Data Analyst position to transform raw data into actionable business insights and support data-driven decision-making.

TECHNICAL SKILLS

- **Programming & Scripting:** Python (Pandas, NumPy, Matplotlib), SQL.
- **Databases & Query Engines:** PostgreSQL, MySQL.
- **Data Visualization & BI Tools:** Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Macros).
- **Analytical Techniques:** Exploratory Data Analysis (EDA), Statistical Analysis (Hypothesis Testing, Probability), Data Cleaning & Wrangling, A/B Testing, Regression Analysis, Dashboard Design
- **Tools & Platforms:** Jupyter Notebook, Google Colab, Git / GitHub, Microsoft Office Suite, Google Analytics
- **Soft Skills:** Data Storytelling & Presentation, Critical Thinking & Analytical Reasoning, Attention to Detail, Cross-Functional Communication, Problem-Solving, Stakeholder Management, Time Management & Prioritization, Curiosity & Self-Learning.

EDUCATION

June 2022	Diploma In Electrical Engineering Govt. Polytechnic, Mohammadi (BTEUP)
June 2026	B.Tech(IT) Rajshree Institute of Management and Technology (AKTU)

PROJECTS

1. Banking Risk Analytics & Loan Approval Dashboard

Tech Stack | Python, MySQL, Power BI

- Developed an end-to-end data analytics solution to identify high-risk loan applicants and minimize financial losses for a banking entity.
- Architected a relational database in **MySQL** using Primary/Foreign keys across multiple tables (Client, Banking Relationship, Investment Advisor) to ensure data integrity.
- Performed data cleaning and feature engineering using **Python (Pandas)**, creating new metrics such as "Engagement Timeframe" to improve applicant profiling.
- Designed an interactive **Power BI dashboard** to visualize credit risk, enabling stakeholders to make data-driven "Approve/Reject" decisions based on repayment probability.

2. Ola Ride-Hailing Analytics Dashboard

Tech Stack | SQL, Excel, Power BI

- Analyzed a ride-hailing dataset using **10+ SQL queries** (JOINS, GROUP BY, Subqueries) to extract KPIs like top customers, cancellation rates, average ratings, and revenue by payment method.
- Cleaned and preprocessed raw data in **Excel** using pivot tables, filters, and conditional formatting for exploratory analysis.
- Built a **Power BI dashboard** with 10 interactive visuals (ride volume trends, driver vs. customer ratings, revenue by payment type) to support operational decision-making.

CERTIFICATIONS

1. Data Analytics Job Simulation | Deloitte Australia (via Forage) | Remote

February 21, 2025

- Completed a hands-on **Deloitte job simulation** focused on **data analytics and forensic technology** within a financial investigation context
- Designed an interactive **Tableau dashboard** to visualize key forensic data patterns, enabling identification of anomalies across multiple data sources
- Performed **data classification and analysis in Excel** using pivot tables, conditional formatting, and logical functions to draw actionable business conclusions
- Demonstrated proficiency in **data-driven decision-making** by synthesizing findings into structured insights aligned with Deloitte's consulting methodology

2. Quantitative Research Simulation | JPMorgan Chase & Co. (via Forage)

March 8, 2026

- Analyzed a **loan portfolio** to estimate customer **Probability of Default (PD)** using quantitative research methods in a simulated credit risk environment
- Converted raw **FICO scores** into categorical risk buckets using **dynamic programming**, improving default prediction accuracy
- Applied **statistical modeling and data classification** techniques to support risk-based lending decisions aligned with JPMorgan's financial research standards

ACHIEVEMENT

- **3rd Place, Aahvan(2024)**: Competed against 150+ participants in a 6+hour coding challenge at the Annual College Fest organized by Rajshree Students Club on 26 February 2024.
